Batu Cermin Cave

Batu Cermin, also known as Mirror Rock, is a tunnel or cave located in the dark stone hills of Labuan Bajo, West Manggarai, Flores, East Nusa Tenggara. Sunlight enters the tunnel through a hole and reflects off the stone walls, creating the appearance of a mirror. This is why the site is called Mirror Rock.

The cave is situated about four kilometers east of Labuan Bajo harbor, away from the town center. It is surrounded by forests where visitors can spot long-tailed monkeys and wild boar.

The beauty of this cave is not visible from the outside, we have to climb a bit for about 5 minutes from the beach, and we'll see a hole with stone stairs leading down to the cave with blue water like a small lake with stalactites, creating a stunning view. We can swim in the cold water of the pool, lined with stalactites.

According to locals, the best time to visit the cave is at noon. The sun rays will be naturally illuminate the cave. A favourite amongst visitors to Labuan Bajo.
